Docket # 04-7984 7-12-04

Walter F. Vogl
Drug Testing Section
Div. of Workplace Programs, CSAP

As someone involved in drug free workplace testing I recommended OraSure Technologies, Inc for after/post accident testing or reasonable suscipion testing. After all is said and done you must consider the integrity of the collection process. I am not a lawyer but I see too many "gaps" in a non trained collector after hours. I know the specimen collected in a proper condition will produce repeatable, accurate results. I have not heard were the collectors are trained and certified. It means something. The collection environment is not controlled and there are too many possibilities of specimen contamination to be approved for drug-free programs
