Subject: Please keep federal COC documents the same

We understand there is a movement to ask that federal drug testing documents be printed on-site. This would be a very difficult task for us as collectors and Medical Review Officer. It would increase our time and manpower which we do NOT have the resources to cover. We also receive documents and drug screens from collection sites all over the country and when they are using non-DOT forms, frequently non-mandated and altered according to their needs and preferences many mistakes and problems occur. This would create terrible problems for the industry. We do NOT support the change for the DOT drug testing industry which is critical for the safety of us all.

Thank you. Sandy Miller
